## Brief Bio Data

---

### **Name: Prof Manish Kaushal**

After completing my post graduation in General Surgery in Year 1999, I choose a new specialty, Breast and Endocrine Surgery for further training in one of premier institute of India (Sanjay Gandhi Post Graduate Institute of Medical Sciences, Lucknow, UP). After finishing of this training I choose my career in Government Medical College in my native state, as there was no superspeciality concept in Government Medical College in MP so I was appointed as Assistant Professor in General Surgery in MGM Medical College, Indore. I tried to establish the dedicated Breast and Endocrine and Cancer Surgery Unit in limited infrastructure. Presently I am working as Professor in same department.

I have attended every meeting ABSI since its incorporation and was very lucky to organize 4<sup>th</sup> Annual Conference of ABSI in Indore from 26<sup>th</sup> to 28<sup>th</sup> June, 2015. This conference was very successful and gave strong message of dedicated breast diseases management. I have also attended many International Breast Conferences including European Breast Cancer Conference, prestigious St. Gallen Breast Conference, and Advance Breast Cancer Conference Lisbon and found that ABSI consensus statement is rightly true that is "Indian solution for Indian problems".

We are regularly organizing short informative session on self breast examinations and breast cancer awareness program in females social groups, girls college and higher secondary schools. Similarly also run informative session on chemoport care, breast cancer management in local nursing and paramedical students.
